

Comprehensive Assessment for Healthcare Professionals

by
William J Heran, PhD, LCSW
David Steinman, MD

We conduct a comprehensive assessment for physicians, medical students, dentists, pharmacists and other healthcare professionals. Our evaluations focus on: substance use disorders, behavioral health concerns and return to duty determinations. We have a highly skilled and seasoned team of medical and psychological clinicians focusing on the needs of professionals. We provide clear and practical recommendations for each participant that we evaluate. A typical turnaround of our assessment report is about two weeks.
